Subject: Climate change section for the Dewey-Burdock cumulative effect analysis for your review
Attachments: DeweyBurdockCEA_Section15ClimateChange.docx

Hello All,

Please find attached the climate change section that is part of the *Cumulative Effects Analysis of the Dewey-Burdock Uranium In-Situ Recovery Underground Injection Control Area Permits* document.

On page 9, I include a question about how to do the calculation for **The Social Cost of Carbon**. Please provide some guidance if possible on how to fit that piece in.

I need to work on conversions between units of measure on page 7.

It still needs more work, but I wanted to get something to you all before any more time goes by.

Thanks for your review! Please edit freely!

Jessica, I see you are out of the office until Thursday, but if everyone else could get back to me by COB Friday, that would be great.

Thanks SO much for your help with this!

Valois
